Are you feeding stray cats?

If you are feeding the local outdoor cats, thanks for being a good neighbor!

You can help improve their quality of life.

Neutered cats make better neighbors — less howling, fighting, and no more litters of kittens!

Please continue to feed and care for the cats while **Trap-Neuter-Return (TNR)** is being performed – the only proven way to humanely decrease cat populations.

Outdoor cats require spay/neuter (TNR) services.

1. The cats are trapped with humane (painless) box traps and taken to a veterinarian to be spayed or neutered and vaccinated.
2. The vet will "eartip" them. An eartip is the universal symbol of a sterilized feral cat *(see photo below)*.
3. We need your help, and ask that you continue to feed and care for the cats when they return home.

If you want to get involved, or to learn more please call:

Local Organization Contact:
